

## Neo4j AuraDB Enterprise on Microsoft Azure

# Build Innovative, Mission-Critical, Applications at Global Scale on Microsoft Azure

Graph databases are highly optimized to understand and work with the complex relationships between your data. Harnessing the power of graphs allows your organization to optimize your investment in [Microsoft Azure](#) so you can uncover rich data connections, run queries magnitudes faster and derive insights from data unknown before.

Neo4j AuraDB™ Enterprise on Microsoft Azure is a fast, reliable, scalable and completely automated graph database-as-a-service enabling you to focus on your strengths – creating rich, data-driven applications – rather than waste time managing the databases.

AuraDB Enterprise now makes the power of data relationships available in a cloud-native environment, enabling fast queries for real-time analytics and insights and gives you a seamless, integrated experience via the Microsoft Azure Marketplace.

### Key Benefits of Neo4j AuraDB Enterprise on Microsoft Azure

**AuraDB Enterprise on Microsoft Azure** is Neo4j’s fully managed cloud database service for organizations building mission-critical, global-scale graph applications. Neo4j Aura is built by the developer of the world’s most popular graph data platform.

#### Zero Administration

Never worry about servers again. With one-click deployment, automated upgrades and fully managed backups, AuraDB significantly accelerates the development and deployment of intelligent applications on Neo4j in the cloud.

#### 99.95% Service Availability Guarantee

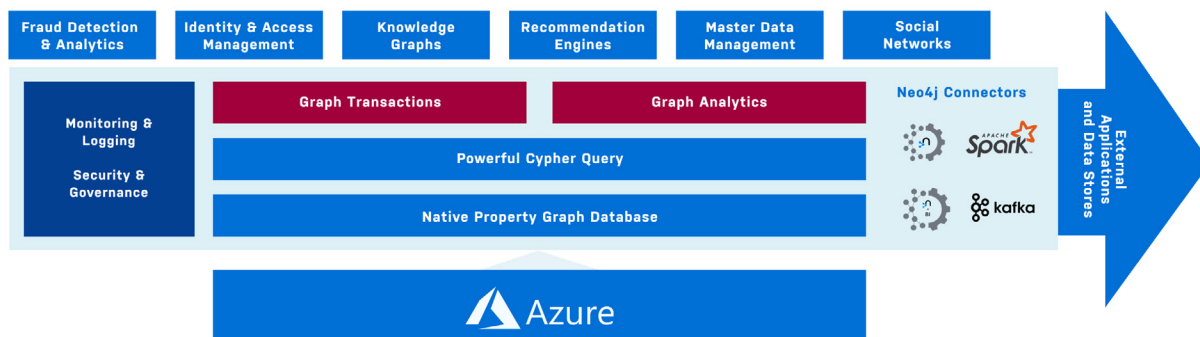

AuraDB is not only fault-tolerant and self-healing for high availability but also designed from the ground-up to be always on. Manage complex processes such as tuning, security patches, software updates and configuration changes with absolutely zero downtime.

#### On-Demand Scaling, No Downtime

With support for a wide range of graph instances from SMB to the Enterprise, AuraDB allows you to manage large data sets with billions of nodes and relationships. Get lightning-fast query performance with an always optimized, fully managed database.

#### Enterprise-Grade Security and Privacy

AuraDB provides world-class security features, controls and privacy to meet the needs of your most sensitive data. Your environment is secure and private with VPC isolation and dedicated cloud infrastructure. With role-based access control and a schema-based security model, data managers can fine-tune access to privileged information stored in Neo4j.

### Data Integrity & Durability

ACID transactions ensure that your data is always consistent. AuraDB replicates your data across three separate physical disks and then across three data centers to ensure data durability. Backup your databases hourly with a 30-day retention policy ensuring your data is always available.

### Built-in Developer Productivity

AuraDB uses Cypher, the world's most popular and powerful graph query language. It also features a flexible data model and built-in developer tools like Neo4j Bloom data exploration and Neo4j Browser query editor and results visualizer. Receive support from the Neo4j Community, the largest and most active graph community in the world.

### Marketplace Availability for Simple Pricing & Predictable Cost

Simplify spend management by procuring and deploying AuraDB via the [Azure Marketplace](#) and get a single bill for all Microsoft services and AuraDB usage. You can use your Microsoft Azure billing arrangement and draw from your spending commitments.

### 24x7 Support

AuraDB offers premium support and priority service, providing teams with everything they need to keep even the most challenging products running – all day, every day.

### Global Availability on the Microsoft Azure Platform

Built on trusted cloud infrastructure, AuraDB may be deployed on any globally-supported region of the Microsoft Azure Platform.

## FEATURES

- ✔ Managed graph database service
- ✔ Scale seamlessly on-demand, no downtime
- ✔ Role-based Access Control with granular database security
- ✔ Supports Cypher, the easy and powerful graph query language
- ✔ Flexible white-board friendly data model
- ✔ One workspace for data import and modeling, low-code querying, and graph visualization.
- ✔ ACID compliant
- ✔ Capacity-based consumption pricing with prepay options
- ✔ Azure marketplace integration
- ✔ Available in all global regions
- ✔ 99.95% service uptime SLA
- ✔ 24x7 Premium support, 1-hour Sev-1 response
- ✔ Professional Services available

Neo4j, the Graph Database & Analytics leader, helps organizations find hidden relationships and patterns across billions of data connections deeply, easily and quickly. Customers leverage the structure of their connected data to reveal new ways of solving their most pressing business problems, with Neo4j's full graph stack and a vibrant community of developers, data scientists and architects across hundreds of Fortune 500 companies.
